- ✓ *Rob Daughdril, We have been working with the worker villages and going out and checking to make sure they have an Emergency plan and if not help them get one together*
- ✓ *One concern is trying to figure out the mobile home parks with campers, because if you tell those to leave they will want to bring their campers and we would have to make sure where they are going they can bring the campers*
- ✓ *Mason Lindsay, G2X has put their facility on hold for now and are working on their facility in Texas at this time*

✓ I-210 Project:

- *Rob Daughdril, Dick talked with DOTD and they are still in the process of getting the paperwork and stuff together. Maybe mid-Summer or later*

✓ Tier II:

- *Mention and discuss how we should go about the Tier II reports that we get that have the incorrect information.*
- *Rob Daughdril, Mentioned to Gene Dunagen last week at the LEPC workshop about the State system and the way they do Tier II reporting, he admitted that the system does not work right*
- *All the States around us are using Tier II submit and it works great*
- *Need to get the LEPC and the others in the State to push for the Tier II submit*

- *When the State receives the Tier II reports they then take them and dump them in to E-plan but the information is wrong*
- *To help get the facilities to enter the right information in on the report, need Mason to form a letter to send to the facilities and say on your report you stated your facility is at this address after our review the address and coordinates are wrong*
- *But the only bad thing is we wouldn't get the correct information until next filing year*
- *Steve Mason also mentioned that the EPA will be having some changes coming up and for all local LEPCs will be getting bigger because EPA will mandate that industries attend their LEPCs*
- *Form a letter to send to the facilities that submit the wrong information, and state in the letter which information is incorrect.*
